

Frequency of Essential Oils

The power of essential oils cannot be fully comprehended without some understanding of their bio-electric properties – commonly known as “Frequency”. - - - Human Electrical Frequencies and Fields

Frequency is the measurable rate of electrical energy flow that is constant between two points. **Everything has frequency.**

Robert O. Becker, M.D., the author of the book, *The Body Electric* validates that the human body has an electrical frequency and that much about a person’s health can be determined by it.

Royal Raymond Rife, M.D., developed a high-powered microscope in the 1920’s that could magnify an object almost 1,500 times. He could see viruses, bacteria, parasites, toxins, etc. in the blood. From this work he developed a “frequency generator” which could generate various electrical frequencies to be passed through an affected or diseased part of the body. [It has been known by medicine for over a hundred years that electrical currents passed through a wound or broken bone will greatly accelerate the healing process.] Furthering his work, he **validated certain frequencies could prevent the development of disease, and others would destroy disease!**

Nikola Tesla said that if you could eliminate certain outside frequencies that interfered in our bodies, we would have greater resistance toward disease.

Bjorn Nordenstrom, a radiologist of Stockholm, Sweden, who wrote "*Biologically Closed Circuits*," discovered in the early 1980s that by putting an electrode inside a tumor and running a milliamp D.C. current through the electrode, he could dissolve the cancer tumor and stop its growth. He found that the human body had electropositive and electronegative energy fields.

Dr. Otto Warburg was a two-time Nobel Laureate and winner of the Nobel Prize for cancer research, for discovering that human cells have an electrical voltage.

Further, current data can be secured in a new book "*Cancer: Cause Cure and Cover-up*" researched by Ron Gdanski and available by calling 1-800-656-7606. He details enzyme function and magnetism, square wave vibrational frequency kills microbes, updates on energy testing for diagnosis of disease and more.

Beyond a doubt, certain frequencies can prevent the development of disease and other frequencies would destroy diseases. Substances of higher frequency will destroy diseases of lower frequency.

[For a few examples visit: The Frequency of Health www.whalemedical.com and The Assemblage Point www.theassemblagepoint.com]

What Does Hertz Mean?

All atoms in the universe have vibrational motion. Each periodic motion has a "frequency", (the number of oscillations per second), measured in Hertz:

- 1 Hertz (Hz) = 1 oscillation per second (ops)
- 1 Kilo Hertz (KHz) = 1,000 ops
- 1 Mega Hertz (MHz) = 1,000,000 ops or 1 million
- 1 Giga Hertz (GHz) = 1,000,000,000 ops or 1 billion
- 1 Tetra Hertz (THz) = 1,000,000,000,000 ops or 1 trillion
- Essential oils are measured in Megahertz frequencies
- Essential oil frequencies start at 52 MHz and go as high as 320 MHz. Rose (Rosa damascena) essential oil has the highest of all the oils at 320 MHz.
- Essential oils align frequencies, thus balancing and harmonizing body organs.
- Mixing or blending essential oils amplifies these frequencies -- This is called "synergy".

A Natural Way To Increase The Body's Electrical Frequency

Clinical research shows that essential oils have the highest frequency of any natural substance known to man, creating an environment in which disease, bacteria, virus, fungus, etc. cannot live. Essential oil frequencies are several times greater than frequencies of herbs, foods and even the human body.

Another worthy point is the influence that thoughts have on our frequency as well. Negative thoughts lowered the measured frequency by 12 MHz and positive thoughts raised the measured frequency by 10 MHz. It was also found that prayer and meditation increased the measured frequency levels by 15 MHz.

Tainio Technologies

- Pollutants lower healthy "Frequency"
- Processed or canned food has a frequency of zero
- Fresh produce has up to 15 MHz
- Dry herbs from 12-22 MHz
- Fresh herbs from 20-27 MHz.
- Frozen foods have a frequency of zero
- Essential Oils are a source of higher frequencies to maintain our good health.

The use of electrical energy to reverse or eliminate disease led to research and discovery of electrical frequencies of essential oils.

Bruce Tainio, owner and President of Tainio Technologies, developed a Calibrated Frequency Monitor that is used to study the bio-electrical frequencies of essential oils and their effect on human frequencies when the oils have been applied to the body. It is called a BT2 Frequency Counter.

In the following tables, some of the frequency findings from the research of Dr. Young with Mr. Tainio's frequency counter are listed:

Please keep in mind that frequencies of essential oils vary according to each batch, growing conditions, soil and weather conditions. Only frequencies are listed as documented from one or two sources: The *Essential Oil Desk Reference*, published by Essential Science Publishing 2001; and *Reference Guide for Essential Oils*, by Connie and Alan Higley, Revised edition 2001.

MHz. Frequencies of YLEO Essential Oil		
Angelica 85	Juniper 98	Peppermint 78
Basil 52	Lavender 118	Ravensara 134
G. Chamomile 105	Melissa 102	Rose 320
Galbanum 56	Myrrh 105	Sandalwood 96
Helichrysum 181		Tansy, Idaho 105

MHz. Frequencies of YLEO Essential Oil Blends

Abundance 78	Joy 188
Acceptance 102	JuvaFlex 82
Aroma Life 84	Melrose 48
Aroma Siez 64	Mister 147
Awaken 89	Motivation 103
Christmas Spirit 104	M-Grain 72
Citrus Fresh 90	PanAway 112
Clarity 101	Peace&Calm 105
Di-Tone 102	Present Time 98
Dragon Time 72	Purification 46
Dream Catcher 98	Raven 70
EndoFlex 138	R.C. 75
En-R-Gee 106	Release 102
Forgiveness 192	Relieve It 56
Gathering 99	Sacred Mtn 176
Gentle Baby 152	Thieves 150
Harmony 101	3 Wise Men 72
Hope 98	Valor 47
Immupower 89	<u>White Angelica 89</u>
Inspiration 141	

Live Frequency

This research is still in its infancy and much research still needs to be conducted, but it is starting to point in a specific direction. The premise is if we keep the body frequency high enough and well oxygenated, we can live free of disease.

Essential Oils are multifunctional so they have a wide spectrum of application. They work for the need that is present. If there is no need present in the body, there is minimal reaction. While oils are not accumulative in the body, **their frequency** and effect is cumulative. They are made of the same substances the body is made of – they are non-toxic.

Essential oils are absorbed and go to work within seconds in the body. Layering the oils in application, and the addition of heat produces faster penetration and results. Essential oils stay in a healthy body up to 8 hours.

Essential oils provide a positive frequency to the body and contain oxygenating molecules which transport nutrients into the cells.

Essential oils and oil blends with higher frequency ranges work in the emotional and spiritual regions. Essential oils and oil blends that have a lower frequency have a more profound effect on making structural/physical changes.

Single oils may be added to a blend to increase effect.

Inhaling essential oils is particularly benefiting because the odor molecules travel up the nose where they are trapped by olfactory membranes. These nerve cells trigger electrical impulses to the olfactory bulb in the brain in 23 seconds. The olfactory bulb (the brain) then transmits the electrical impulses to other body centers. Essential oils have a profound physiological and psychological effect.

More on Dr. Royal Rife:

In the early 40's Rife, in conjunction with a number of doctors in Southern California, began to experiment using FREQUENCY to treat cancer patients.

They were having excellent results when the AMA stepped in, turned on Rife and virtually ruined him. He died penniless and a broken man in Mexico. Dr. Royal Rife should have been a Nobel Laureate and winner of the Nobel Prize for his research on destroying cancer and other diseases, but instead the controlling elite destroyed him and buried his technology.

However, Rife's technology has reemerged and until recently these machines have stayed underground. Currently, the FDA goes crazy at the mention of these machines or technology and will shut down or jail any medical practitioner caught using a Rife Frequency Generator. Why??? Because it works! [This is why so many cancer treatment clinics have sprung up in Mexico, the Caribbean and Europe]

Frequencies of the Human Body in MHz

- Normal brain frequency (head) 6:00 am to 6:00 pm is 70-78 MHz
- Brain frequency at 80-82 MHz, indicates a genius
- Healthy body (neck down) 6:00 am to 6:00 pm is 62-68 MHz
- Thyroid and Parathyroid glands are 62-68 MHz
- Thymus Gland is 65-68 MHz
- Heart is 67-70 MHz
- Lungs are 58-65 MHz
- Liver is 55-60 MHz
- Pancreas is 60-80 MHz
- Disease begins, colds invade at 59-60 MHz
- Stomach is 58-65 MHz
- Ascending Colon is 58-60 MHz
- Descending Colon is 58-63 MHz
- Flu like symptoms at 58 MHz
- Viral Infection at 55 MHz
- Epstein Barr at 52 MHz
- Tissue breakdown from disease at 48 MHz
- Cancer at 42 MHz
- Death begins at 20 MHz

[The above frequency information was taken from Taini Technologies]

Human cells start to mutate when their frequency drops below 62 MHz. Low frequency also indicates a pH imbalance. Invading pathogenic frequencies including biologicals, i.e., anthrax, plagues, etc. are low. Positive beneficial bacterial frequencies are higher.

Suppressed Bio-Electric Technologies and Therapies

Numerous cancer and degenerative disease therapies are suppressed. The pharmaceutical and drug makers control the majority of suppression; however, an annually multi-billion dollar industry (universities, medical equipment, Wall St., foundations, etc) gladly supports the suppression.

Oxygenation therapies are so powerful in helping nerve damage. The oxygen molecule carries a lot of the magnetic charges.

Homeopathics work because of electromagnetic frequencies stored in water molecules mostly composed of oxygen attached to hydrogen. This water is responsible for more than 90 percent of the active function of DNA. Homeopathy is based on matching 'the frequency' of the homeopathic to the specific disease frequency to obtain healing.

Herbal remedies, as well as essential oils, are under constant attack! Essential oils work primarily because they are composed of electromagnetically charged particles, especially oxygen. Essential oils have their own unique frequency signal based upon its varying species. Dried and fresh herbs have a lower frequency than an essential oil.

The Frequency of Health - Electronic Medicine cannot be fully comprehended without some understanding of their bio-electric properties - commonly known as "Frequency". Just like radio signals relay messages, and computers have electromagnetic memory, so too are miracles possible, if not probable, by intelligently applying our current knowledge. The power of prayer has also been suppressed. Just because you cannot see something does not mean it does not exist.

Radionics employs another deeper level of electromagnetic energy physics. Have you ever witnessed dowsing, or divining rod usage? Very subtle energy vibrations make their way to simple coat hangers - which converge and cross. This is quantum physics and radionic energy.

Interesting note:

Early 1940's during the development of the EEG, Harvard Medical School and MIT Mathematicians joined forces to study the concept of how the human brain worked. They discovered a combination of analog and digital coding taking place within the brain. They used this study to bring us the first computers during World War II. Robert O. Becker, M.D., the book *The Body Electric*
